

SERRA SOLDADURA, S.A.

Barcelona (Spain)

Visit us: www.serrasold.com

SERRATRON Knowledge Site: serratron.serrasold.com

You are going to install the **TP-10 Editor** software.

This will allow you to customize, format and program messages onto a TP-10 programming unit.

SYSTEM REQUIREMENTS

To run the program properly, you need:

- Windows 95, 98, NT 4.0 or 2000
- RAM: 64 Mb
- An Ethernet network running TCP/IP protocol

NEW FEATURES

Version 1.2 (Feb 12, 2002)

- Works with any Timer Serratron 300xx or Serratron 100xx.
- Added "Match TP-10 – Serratron" option.

Version 1.3 (Dec 20, 2006)

- Works with Serratron MFC-3000 too.

Version 1.4 (Nov 12, 2012)

- Works with Serratron 1B too.

Version 1.5 (Nov 3, 2014)

- Custom logo on reports. If "PrintLogo.bmp" is present on exe path, it is printed instead of SERRA logo.

Version 1.6 (May 3, 2017)

- Support for Central European character set.
